WORK EXPERIENCE

Frontend Engineer

Dowell Research - *Singapore (Remote)*

Jan 2023 - present

- Collaborated with my team and cross-functional technical teams and relevant stakeholders in the organization to develop and enhance Dowell's user-centric living lab website and other digital products some of which were sold as third-party platforms on Amazon, leveraging React framework to ensure a seamless user journey.

- Contributed to the successful development of a high seller WordPress plug-in, utilizing React to implement a Net Promoter Score (NPS) scale, which also featured a customized WordPress plug-in for detailed scale-based reporting. We sold this product to about 20 companies within the first two (2) months after going live.
- Proficiently translated well developed Figma designs into readable and excellent code, utilizing React to give high-quality, visually compelling user interfaces.
- Collaborated closely with the engineering team, ensuring an inclusive and diversified working environment fostered by innovation and teamwork to drive individual and project success and achieve the overall company's goal.
- Demonstrated 95% expertise in software maintenance, meticulous testing, and swift bug fix, to optimally improve and consistently refine user experience.
- Improving and developing both soft and hard proficiencies through targeted trainings and insightful research, further improving the user experience of products that aligns with the latest advancements in the field.

Frontend Engineer

Upwork - Freelancer (Remote)

Jan 2022 - present

- Developed and deployed captivating websites for diverse clients, through adept utilization of the React framework to prioritize and create exceptional user interfaces and experiences.
- Demonstrated commitment and ownership by consistently maintaining websites, introducing novel features, and ensuring ongoing functionality enhancements to meet client specifications.
- Translated intricate Figma designs into meticulously executed, high-quality code using React, ensuring seamless integration of design, functionality and user experience.
- Played a significant role in ensuring client satisfaction by swiftly addressing and resolving bugs and issues in websites and applications, contributing to an optimized end-to-end user experience.

PROJECTS

● HBT Hotel Website

https://hotel-static-website-odinaka.netlify.app (HTML, CSS)

- A tool that allows guests and prospective guests to get an accurate view of the hotel and thus make an informed booking decision and also take feedback from guests. Responsive to mobile.
